Join the Cal Energy Corps

Develop and deliver sustainable energy & climate solutions around the world

Paid Undergraduate Internship Opportunities - Summer 2012

- Create “green coal” as industrial fuel
- Design and test cook stoves
- Evaluate policies that promote sustainable development
- Help to produce biofuels
- Improve photovoltaics for integration into electricity grid
- Assess urban design for high density cities
- Build models to better understand climate change
- Examine rapidly changing solar photovoltaics markets worldwide
- And more!

The Cal Energy Corps is an internship program created to engage the best and brightest UC Berkeley undergraduates. Placements are challenging, hands-on assignments with leading organizations.

Summer 2012 positions available in:
- Bay Area
- Brazil
- China
- Germany
- Ghana
- Hong Kong
- India
- Nicaragua
- Taiwan

The Cal Energy Corps helps cover transportation and housing costs, as well as a weekly stipend of $600 for the duration of the internship. All placements are full-time.

Application Deadline: Sunday, March 18, 2012
